

Sandith Sithmaka Thenuwara

Design Engineer | Creative Frontend | Next.js, Product UI/UX & Creative Technology

Sri Lanka | lthenuwara@gmail.com | linkedin.com/in/sandith02 | github.com/Sandith02 | +94 76 692 6418

Profile

Design Engineer and frontend developer focused on creating distinctive digital experiences that combine strong visual direction with production code. Experienced across React, Next.js, TypeScript, Three.js, UI/UX, interaction design and branding, with hands-on ownership from concept and design through fullstack implementation, deployment and iteration.

Experience

Cogent Solutions Event Management | Junior Full-stack Developer

Dec 2025 - Present

Previously Full-stack Developer Intern | Aug 2025 - Dec 2025

- Built and shipped the complete Next.js frontend for cogentsolutions.ae, translating creative direction into responsive, reusable production interfaces.
- Design and develop event/campaign experiences and internal tools, turning business requirements into clear user flows, responsive interfaces, and maintainable UI.
- Work across REST APIs, routing, Vercel/Ubuntu deployment, and production troubleshooting to take experiences from implementation through release.
- Iterate on live interfaces using stakeholder feedback, GA4, Search Console, technical SEO findings, and visual QA.
- Support campaign strategy, content planning and creative direction for ongoing B2B event campaigns, including Cogent's expansion into the East African market.
- Recognised as Employee of the Year 2026 - Sri Lanka Team.

Tourithm | Design Engineer (Freelance)

2026 - Present

- Own design-engineering work across branding, UI/UX, frontend implementation, review, and deployment for client web products.
- Translate business goals into page architecture, interaction patterns, responsive/mobile states, and polished interfaces while working directly with clients through iterative feedback.
- Current: created the full Go Technologies brand identity and am building its Next.js/TypeScript experience alongside product UI work for Go Chauffeur.

Selected Product Work

Cogent Solutions Corporate Platform | Next.js, TypeScript, Supabase, Tailwind CSS, Multi-Zones · GA4

Rebuilt and migrated the legacy corporate website into a modern Next.js platform for an international B2B audience, with responsive, animation-led interfaces. Implemented Supabase-backed workflows and Next.js Multi-Zones architecture, supporting production routing and deployment across the wider web ecosystem. Integrated GA4, Google Search Console and Vercel Analytics to monitor traffic, search visibility and post-launch performance.

SuperNizo - Internal Lead Enrichment & Outreach Platform, Cogent Solutions | Next.js, Frontend Engineering, Product UI/UX, Make.com

Designed and developed the complete frontend for Cogent's internal lead generation, enrichment and outreach platform. Built a modern, workflow-focused dashboard for managing lead data, enrichment and outreach operations, with a strong emphasis on usability and visual hierarchy. Supported Make.com automation workflows and deployment within a Hetzner-hosted production environment.

Go Technologies + Go Chauffeur | Next.js, Frontend Engineering, Product UI/UX

Developed the complete visual identity and brand system for Go Technologies and Go Chauffeur, carrying the brand direction into their digital products. Currently designing and developing the Go Technologies corporate website using Next.js, TypeScript, Three.js and motion-driven interactions. Leading UI/UX and frontend development for the Go Chauffeur web application, translating operational and customer journeys into a modern, scalable product experience.

Brand, Campaign & Digital Creative Work

Cogent Solutions Event Management/ Tourithm

Develop campaign concepts, content plans and visual direction for B2B event marketing at Cogent Solutions and tourism-focused campaigns at Tourithm. Design social media creatives, campaign posters and digital assets, with primary ownership of Tourithm's visual content and selected Cogent campaign work. Translate campaign strategy into consistent cross-channel visual systems across social, web and promotional content.

Technical Skills

Frontend: React, Next.js (App Router), Three JS, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3

Product Design: UI/UX, user flows, responsive/mobile UI, interaction design, Figma, visual identity, accessibility

Backend & Data: Supabase (Postgres, Auth, Storage, Realtime, RLS), REST APIs, Java, Spring Boot, MySQL

Delivery: Git, GitHub, Vercel, Ubuntu/Linux, Postman, production QA/troubleshooting, GA4, Search Console

Motion & Creative Tech: Three.js, GSAP, Framer Motion, Lenis, scroll-driven interactions

Education

BSc (Hons) Computer Science with Industrial Experience | Sep 2023 - Expected May 2027 (Part-Time)

University of Westminster - delivered at Informatics Institute of Technology (IIT), Sri Lanka

Recognition & Community

Employee of the Year 2026 - Sri Lanka Team, Cogent Solutions

IEEE Robotics & Automation Society, IIT (UOW) - Design Volunteer → Design Vice Chair → Public Visibility Vice Chair across Three 2025 flagship events

Led and contributed to the visual direction of three flagship events, covering posters, campaign graphics, logos, merchandise, attendee tags and event branding. Helped establish a distinctive visual identity across the 2025 event cycle, carrying design work from digital promotion into physical event assets and on-site experience.

Additional: IEEE Xtreme 18.0, CodeSprint 8, IX25
